

HaiClear Spinwindow

Your Solution For A Clear View

Demonstration Video: <https://www.youtube.com/shorts/h045p2KMSNc>

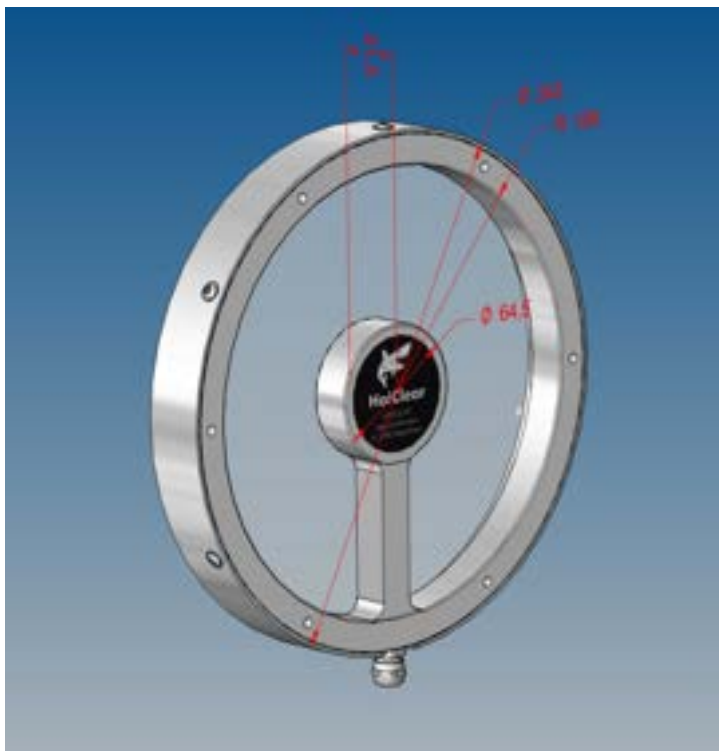

The Main Principle:

The new HaiClear Spinwindow is designed to always provide a clear view on the production process even under toughest conditions. This spinning machinewindow uses the centrifugal force to fling off any striking cutting fluids. Whether the coolant is water-soluble or not, the new HaiClear enables the operator to have a clear view into the machining area at all times. The added drainage features guarantee the clearest possible view even for high volume applications.

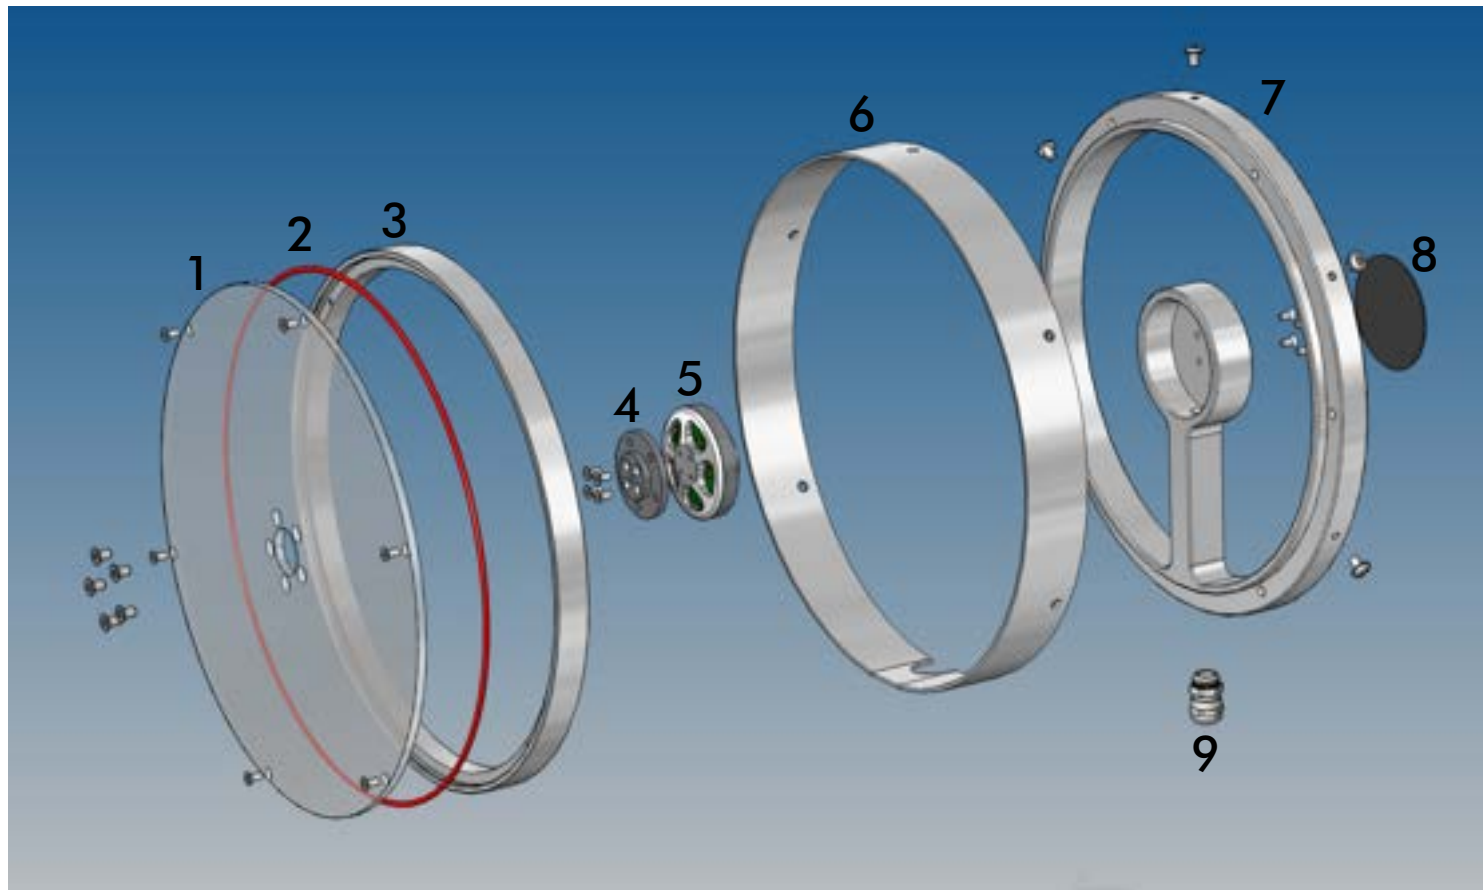

Advantages:

One of the lowest installation height (31,5mm) - High safety thanks to the polycarbonate rotation disc - All components can be replaced very easily - It can be installed on glass and also on polycarbonate Machinewindows - Designed for maximum clear view area - Light weight aluminium design

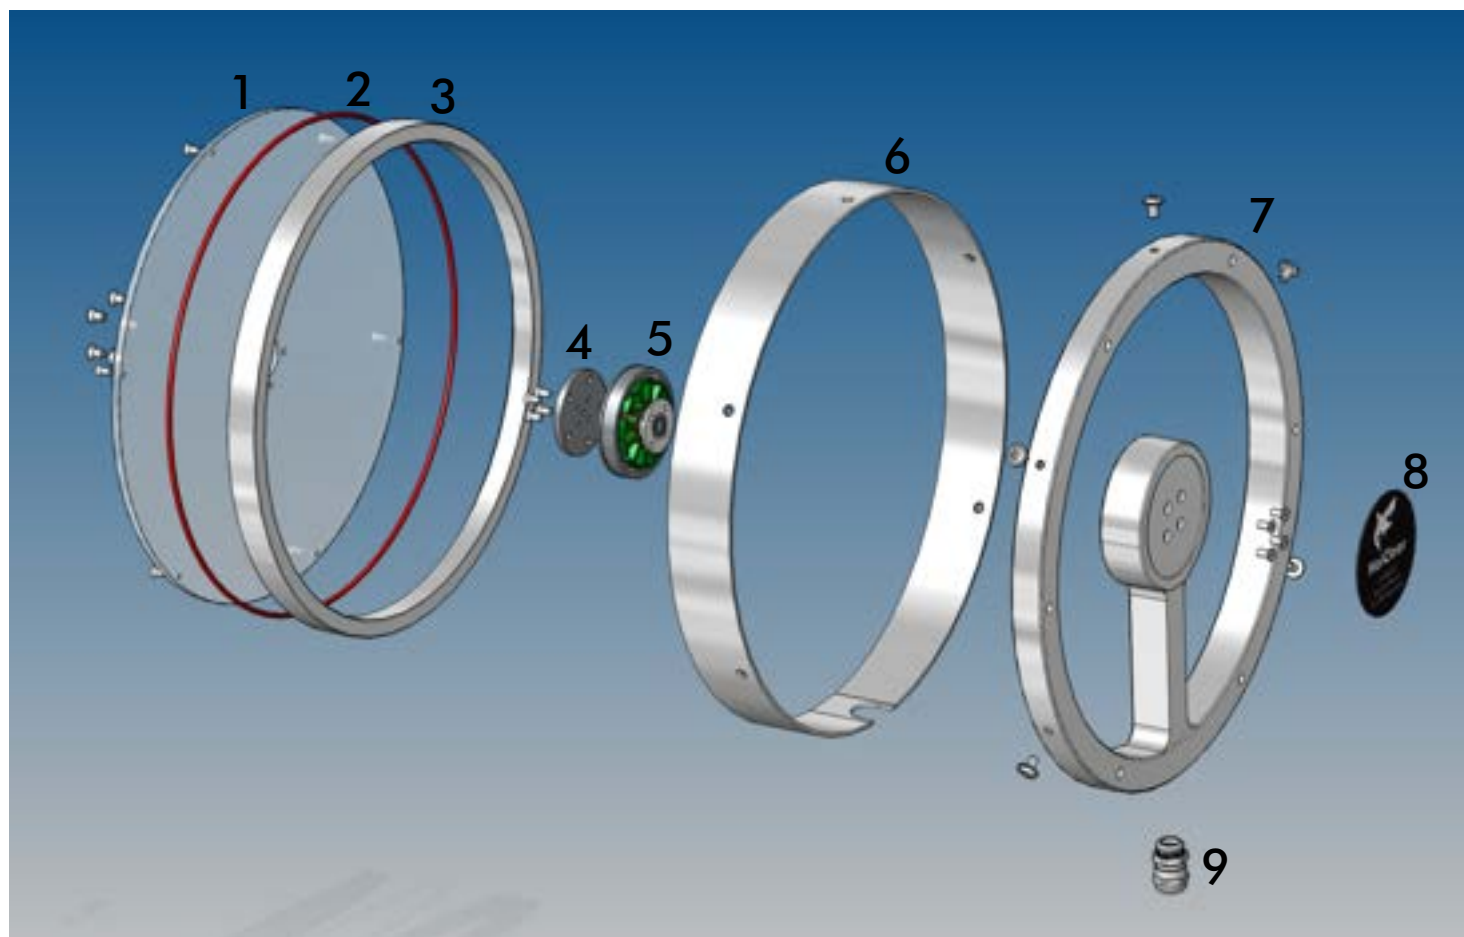

Scope of delivery:

- HaiClear Spinwindow
- Brushlessmotor controller with softstart function
- Powersupply 24V 5A
- 5m connection cable (custom length possible)

- 1:** Polycarbonat disc
- 2:** Seal for polycarbonat disc
- 3:** Aluminium ring
- 4:** Motor flansch
- 5:** BLDC Motor

- 6:** Aluminium safety ring
- 7:** Main part
- 8:** Nameplate
- 9:** Cable gland
